

# CAROLINE KIARIE

## Frontend Web Developer

I am passionate frontend developer who specializes in creating visually stunning websites that deliver unparalleled user experience. My knowledge in HTML, CSS, Javascript and React, combined with proficiency in libraries such as Bootstrap allows me to create dynamic and interactive designs. I have experience with version control systems such as Git and strong problem-solving, debugging and troubleshooting skills

### PROJECT

#### RECIPE-SEARCH WEBSITE

This was a solo project that I worked on to improve my skills on how to interact with APIs and used React, Javascript, Css and Html to achieve the end result.

- A website that allows users to search for and view recipes, specify the number of portions, save liked recipes and upload their own recipes with ingredients. If there are more than ten search results, they will be divided into multiple pages.

### Work experience

#### REGINALD CONSTRUCTION COMPANY

ASSISTANT PROJECT MANAGER(June 2019-April 2022)

- Learned about the operations of the company's tech team
- Coordinated communications between multiple departments
- Assisted with the development of training materials for new employees
- Participated in process improvement initiatives to increase company efficiency.

### Education History

#### Masters in Information Management

Institution: International University of Applied Sciences

Year of Graduation: 2023

#### Bachelor in Food Science and Technology.

Institution: University of Nairobi

### Relevant Skills

- React, Javascript, Css, Html, Bootstrap, Sass , firebase
- Figma, Wordpress, Adobe creative suite, Version control systems such as Git
- Technical Documentation
- Understanding of web development concepts such as DOM manipulation tools and web architecture

### Soft Skills

- Time management
- Effective communication
- Adaptability
- Strong problem skills and troubleshooting skills
